Experience

- **AYLIEN** **Dublin, Ireland**
  Research Scientist *10/2015 – Present*
  - Developed new aspect-based sentiment analysis (ABSA) endpoint[1] for four domains; created data collection and training pipeline; implemented semi-supervised convolutional neural networks.
  - My current work focuses on developing and improving systems for sentiment analysis with a focus on aspects and entities and adapting systems to new domains and languages. For the latter objective, I also work on developing new general-purpose cross-lingual embeddings for words and documents.
- **INSIGHT Centre for Data Analytics** **Galway, Ireland**
  Research Assistant *10/2015 – Present*
  - As a member of the INSIGHT Centre, I collaborate with other researchers on emotion detection, sentiment analysis, and review analysis.
- **IBM** **Munich, Germany**
  Extreme Blue Intern, Watson *08/2015 – 09/2015*
  - Design and implementation of text analysis ML components applied to customer data of leading German insurance company *Versicherungskammer Bayern*; automatically identifies structural semantics and sentiment of incoming e-mails, e.g. complaints and classifies email based on reason for complaint.
  - Pitched project to audience at European Expo and was chosen as one of eight teams to pitch to IBM customers; project was referred to as a "lighthouse project for Watson in Europe" by jury members.
  - Project was awarded Digital Thought Leadership award in leading contest of German insurance industry by leading German newspaper *Süddeutsche Zeitung* and Google[2] and covered by *Süddeutsche Zeitung*[3].
- **Microsoft** **Dublin, Ireland**
  Linguistic Engineering Intern, XBox *02/2015 – 06/2015*
  - Contributed to developing an ML system for analyzing linguistic complexity of strings in C# for localization prioritization during testing; performed feature analysis and framed problem as anomaly detection.
  - Created proof of concept and implemented terminology validation algorithm using morphology generation.
  - Evangelized customer sentiment analysis efforts, drove cross-team collaboration, and provided insights to stakeholders.
- **The OpenCog Foundation** opencog.org
  Google Summer of Code Intern *Summer 2014*
  - Enabled system to make common-sense inferences and deductions ("Socrates is mortal", etc.).
  - Applied inference using probabilistic logic networks on the output of a relationship extractor.
  - Documented and extended Python code for temporal inference.
- **Lingenio GmbH** **Heidelberg, Germany**
  Software Engineering Intern *Spring 2014*
  - Created a converter from TBX to Lingenio native format and vice versa.
  - Integrated TBX term bases in Dictionary Server; created localized web service using Jinja2, Flask-Babel, and lighttpd.
- **SAP** **Walldorf, Germany**
  Working Student, Development University *02/2013 – 02/2014*
  - Created content for internal programming and Design Thinking courses.

[3] http://www.sueddeutsche.de/wirtschaft/kuenstliche-intelligenz-aerger-fuer-watson-1.2772927

  - Automated reporting processes, e.g. reduced expenditure of work for monthly training report by > 75%, i.e. from 8 hours to 2 hour using Excel / VBA scripts.

- **TEMIS** **Heidelberg, Germany**
  Freelancing Developer *02/2013 – 10/2013*
  - Created a cosine metric-based word sense disambiguation system leveraging tens of GB of text extracted from Wikipedia and DBpedia in Python; achieved performance comparable to the state-of-the-art.

Education

- **National University of Ireland** **Galway, Ireland**
  College of Engineering and Informatics, Ph.D. Natural Language Processing *10/2015 – Present*
  - Research in applying ML and deep learning techniques to cross-lingual sentiment analysis in different domains as well as aspect- and entity-based. I'm interested in developing new algorithms and data sources to improve sentiment analysis systems and adapting them to other languages by leveraging existing monolingual / bilingual data as well as generating new data.
  - More broadly, I'm interested in learning better (cross-lingual) representations for words and documents, leveraging compositionality not only of natural language, and using conversations for language learning.
- **Ruprecht-Karls-Universität Heidelberg** **Heidelberg, Germany**
  Institute of Computational Linguistics, B.A. Computational Linguistics, English Linguistics *10/2012 – 09/2015*
  - Final grade: 1.0 (German scale), i.e. A+; thesis: *Construction and Analysis of an Emotion Proposition Store*
  - Relevant courses: Statistics, Algorithms and Data Structures, Machine Learning, Formal Syntax & Semantics
  - Relevant online courses: Machine Learning (Stanford), AI (MIT), Into to Algorithms (Berkeley), Deep Learning for NLP (Stanford), Deep Learning (Oxford)
- **Trinity College** **Dublin, Ireland**
  School of Computer Science and Statistics, Computer Science and Language *09/2014 – 01/2015*
  - Semester abroad
  - relevant courses: AI, Fuzzy Logic, High-Tech Entrepreneurship

---

Awards

- Scholarship of the Irish Research Council *10/2015 – Present*
- Cusanuswerk scholarship of the German state *04/2014 – 09/2015*
- Microsoft Certified Professional (Programming in C#) *06/2015*
- Best Delegate award in various Model United Nations conferences *11/2012 – 01/2014*

Languages and Technologies

Programming Languages: Python, Java, C#, R, C, LaTeX, Prolog, JavaScript, SPARQL
Technologies: SciPy, NumPy, Keras, TensorFlow, scikit-learn, NLTK, CoreNLP, MALLET, Weka, UNIX, Git
Natural Languages: Fluent in German and English, advanced in French and Spanish, beginner in Portuguese and Latin
Open Source Contributions: The OpenCog Foundation
