Cathedral Court, New Street South • Dublin, Ireland

Experience

- **AYLIEN** **Dublin, Ireland**
Research Scientist *10/2015 – Present*
 - Developed aspect-based sentiment analysis (ABSA) endpoint¹ and created sentiment analysis models on-par with state-of-the-art².
 - Developed models for a novel form of stance detection from scratch. Collected data, crowd-sourced annotations, and iterated upon the models in dialogue with the customer.
 - My current work focuses on productizing research insights by developing efficient transfer learning algorithms and state-of-the-art models for novel problems as well as existing applications such as stance detection and emotion detection.
- **IBM** **Munich, Germany**
Extreme Blue Intern, Watson *08/2015 – 09/2015*
 - Design and implementation of text analysis ML components applied to customer data of leading German insurance company *Versicherungskammer Bayern*; automatically identifies structural semantics and sentiment of incoming e-mails, e.g. complaints and classifies email based on reason for complaint.
 - Pitched project to audience at European Expo and was chosen as one of eight teams to pitch to IBM customers; project was referred to as a "lighthouse project for Watson in Europe" by jury members.
 - Project was awarded Digital Thought Leadership award in leading contest of German insurance industry by leading German newspaper *Süddeutsche Zeitung* and Google³ and covered by *Süddeutsche Zeitung*⁴.
- **Microsoft** **Dublin, Ireland**
Linguistic Engineering Intern, XBox *02/2015 – 06/2015*
 - Contributed to developing an ML system for analyzing linguistic complexity of strings in C# for localization prioritization during testing; performed feature analysis and framed problem as anomaly detection.
 - Created proof of concept and implemented morphology-based terminology validation algorithm.
 - Evangelized customer sentiment analysis efforts, drove cross-team collaboration, and provided insights to stakeholders.
- **The OpenCog Foundation** **opencog.org**
Google Summer of Code Intern *Summer 2014*
 - Implemented deductive reasoning algorithms to enable a model to make common-sense inferences, e.g. *All men are mortal. Socrates is a man. → Socrates is mortal.*
 - Applied inference using probabilistic logic networks on the output of a relationship extractor.
 - Documented and extended Python code for temporal inference.
- **Lingenio GmbH** **Heidelberg, Germany**
Software Engineering Intern *Spring 2014*
 - Created a converter from TBX to Lingenio native format and vice versa.
 - Integrated TBX term bases in Dictionary Server; created localized web service using Jinja2, Flask-Babel, and lighttpd.
- **SAP** **Walldorf, Germany**
Working Student, Development University *02/2013 – 02/2014*
 - Created content for internal programming and Design Thinking courses.
 - Automated reporting processes, e.g. reduced expenditure of work for monthly training report from 8 hours to 2 hours using Excel / VBA scripts.

⁴<http://www.sueddeutsche.de/wirtschaft/kuenstliche-intelligenz-aerger-fuer-watson-1.2772927>

- **TEMIS** **Heidelberg, Germany**
02/2013 – 10/2013
Freelancing Developer
 - Created a cosine metric-based word sense disambiguation system leveraging text extracted from Wikipedia and DBpedia dumps; achieved performance comparable to the state-of-the-art.
-

Education

- **National University of Ireland** **Galway, Ireland**
10/2015 – Present
College of Engineering and Informatics, Ph.D. Natural Language Processing
 - I am interested in creating methods that allow efficient adaptation to novel domains and tasks in real-world scenarios by leveraging knowledge from related tasks and domains. My main research interests are domain adaptation, transfer learning, and multi-task learning for Natural Language Processing.
 - **University of Copenhagen** **Copenhagen, Denmark**
04/2017 – 06/2017
Natural Language Processing Group, Department of Computer Science
 - Research visit invited by Anders Søgaard.
 - Created a new model for multi-task learning that learns which parts of the model to share.
 - **Ruprecht-Karls-Universität Heidelberg** **Heidelberg, Germany**
10/2012 – 09/2015
Institute of Computational Linguistics, B.A. Computational Linguistics, English Linguistics
 - Final grade: 1.0 (German scale), i.e. GPA 4.0; thesis: *Construction and Analysis of an Emotion Proposition Store*
 - **Trinity College** **Dublin, Ireland**
09/2014 – 01/2015
School of Computer Science and Statistics, Computer Science and Language
 - Semester abroad
 - relevant courses: AI, Fuzzy Logic, High-Tech Entrepreneurship
-

Awards

- Scholarship of the Irish Research Council 10/2015 – Present
 - *Cusanuswerk* scholarship of the German state 04/2014 – 09/2015
 - Microsoft Certified Professional (Programming in C#) 06/2015
 - Best Delegate award in various Model United Nations conferences 11/2012 – 01/2014
 - Second and third prizes *Bundeswettbewerb Fremdsprachen*, national foreign languages competition 2007 – 2008
 - First and second prizes *Landeswettbewerb Mathematik*, state mathematics competition 2006 – 2008
-

Languages and Technologies

Programming Languages: Python, Java, C#, R, C, \LaTeX , Prolog, JavaScript, SPARQL

Technologies: SciPy, NumPy, Keras, TensorFlow, DyNet, scikit-learn, NLTK, CoreNLP, MALLET, Weka, UNIX, Git

Natural Languages: Fluent in German and English, advanced in French and Spanish, beginner in Portuguese and Latin

Open Source Contributions: The OpenCog Foundation

Other activities

- **Natural Language Processing Dublin organizer** 08/2016 – Present
 - Organized 8 events. Meetup⁵ has 500+ members and connects students, researchers, and industry professionals.
-
